

Registered Quality and Environment Management System Company

Technical Data Sheet LOXEAL 28-10

Description

Anaerobic curing adhesive for the gasketing and sealing of flanges.

It replaces solid gaskets and gives elastic cured films. To seal against gases, water, LPG, hydrocarbons, oils and other chemicals. Thixotropic property prevents sealant migration before or during curing.

Shocks and vibrations resistant; unaffected sealing properties in the temperature range from -55°C to +150°C.

Physical properties

Composition: anaerobic methacrylate

Colour: green
Fluorescence: under blue light
Viscosity (+25°C - mPa s): 17.000 - 60.000 HT
Specific weight (+25°C - g/ml): ap. 1.05

Specific weight (+25°C - g/ml): ap. 1,05 Gap filling: 0,30 mm Flash point: > +100°C

Shelf life +25°C: 1 year in original unopened packaging

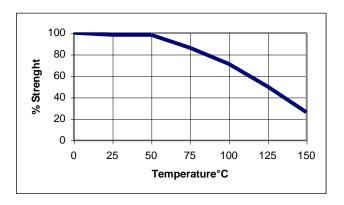

Curing performance

Curing rate depends on the assembly clearance, material surfaces and temperature. Functional strength is usually reached in 1 - 3 hours and full curing takes 24 - 36 hours. In case of passive surfaces and/or low temperature a fast cure can be obtained using Loxeal activator 11.

Environmental resistance

The graph below shows the mechanical strength vs. temperature.

Steel specimen - ISO 4587

Curing properties

Bolt M10 x 20 Zn - quality 8.8 - nut h = 0.8 d at +25°C

20 - 40 minutes Handling cure time: Functional cure time: 3 - 6 hours Full cure time: 6 - 24 hours Shear strength (ISO 10123): 4 - 6 N/mm² Tensile strength (ISO 6922): 2 - 4 N/mm² Impact strength (ASTM D-950): 2 - 4 KJ/m² Elongation at break: more than 100% Temperature range: -55°C/ +150°C

Chemical Resistance

Aged under conditions below after 24 hours from polymerisation at indicated temperature.

Substance		Resistance	Resistance
	after 100 h	after 500 h	after 1000 h

Motor oil	125	excellent	excellent	excellent
Gear box oil	125	excellent	excellent	excellent
Gasolina	25	good	good	good
Water/glycol 50%	87	excellent	excellent	excellent

For information on resistance with other chemicals, contact Loxeal Technical Service

Directions for use

The product is recommended for use on metal surfaces. Clean and degrease parts before bonding with Loxeal Cleaner

Apply product to fill completely the gap, assemble parts and hold on for curing time. Liquid product can damage coating, some plastics and elastomers and late stress-cracking events might be induced if used with some thermoplastics.

For application on non metal materials, contact Loxeal Technical Service.

For disassembly, use normal tools and eventually heat pieces at 150/250°C, remove any residue of cured product mechanically and clean parts with Acetone.

Storage

Keep product in a cool and dry room at no more than +25°C. To avoid contaminations do not refill containers with used product. For further information on applications, storage and handling contact Loxeal Technical Service

Safety and handling

Consult the Safety Data Sheet before use.
